

American beauty

10 The owners of this inner-city Brisbane home spend a lot of time in the United States and wanted to emulate the look of a classic American interior in their bedroom. By using statement pieces of furniture sourced in the US and hanging an eye-catching Cafe Lighting pendant light from the high ceiling, this space has been rendered light, warm and welcoming.

WHY IT WORKS Thanks to the decor's muted colour palette, built-in joinery and quilted bed upholstery, the room has an easy glamour that reflects an American aesthetic, merging elements of Hamptons and Hollywood Regency styles. Soft carpeting adds another layer of comfort in a space that should always be focused on rest and relaxation.

OWNERS VERDICT "We've always wanted a home with a classic American character. Leigh made that a reality and brought our vision to life. Every time I walk into our bedroom I feel relaxed and at home."
